33 Out of Every 100 School Boys are Flat-footed!

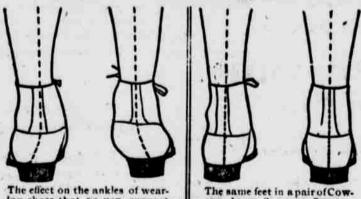

This is the recent statement of a prominent Public School Official, and doubtless an even greater proportion of arch weakness would be discovered among school girls.

Among physiologists, it is generally admitted that "flatfoot" is a frequent cause of spinal trouble, as a broken arch throws the body in strained positions.

Orthopedists agree that proper mechanical support is the only effective remedy for falling arch and "flat foot." Leading surgeons endorse the COWARD ARCH SUPPORT SHOE as the one which is anatomically correct and helpful.

This shoe, made on the Coward Orthopedic Last, allows the foot to meet the ground in a natural manner. The extension heel and arch support, steady the ankle, raise the sagging muscles, and encourage correct walk

Wearing this Coward Shoe, holds the arch structure in its normal position and prevents and corrects "flat-foot." The Coward is the original Arch Support Shee. The public is cautioned against imitations. The genuine is sold only at the one Coward Shee store.

We must admit a disinclination to end it so soon, for besides being a remarkable week in a business way, it has been a very pleasant one. The very first customer to enter our very first little store on

Cortlandt Street came in to see us and to buy, just as he has done regularly ever since that day we opened, 24 years ago.

Many, many other old and comparatively new "regulars" came in to buy, as did many other men and young men who were probably never in ur store before, but who will, we hope, become regulars. In fact, we are confident that they will if their regularity depends on the remarkable values they received in the Brill stores this week.

Never before, in the 24 years of good value giving, which has made the Brill Stores famous, and to which we attribute our remarkable and rapid growth, have we offered such exceptional values as are to be had in these Winter Suits at \$21.50 and \$14.50, nor have we had such a
